

PRESCHEM PP Series Plastics Plugs

(Also known as PP Plugs)

Technical Data Sheet TDS 26

DESCRIPTION

Polypropylene plastic plugs used to seal treatment holes in where Preschem rods are used. The plugs are designed to keep out dirt and moisture. The plugs protect the rods against rain water that would otherwise shorten their lifespan. The PP series plugs are tapered with an helical thread to aid insertion and to ensure a watertight fit.

APPLICATION METHOD

The PP plugs are inserted into each treatment hole where Preschem Polesaver Rods have been installed using the Preschem Plug Insertion tool (Available separately).

SIZES AVAILABLE

PP Plugs are available in sizes PP12 , PP16 , PP19 and PP27

	Treatment Hole Diameter(mm)	Length (mm)	Narrow Diameter (mm)	Wide Diameter (mm)	Picture
PP12	12mm	30mm	9mm	15mm	
PP16	16mm	40mm	10mm	20mm	
PP19	19mm	30mm	17mm	21mm	
PP26	26mm	30mm	21mm	27mm
