

NO-ROT GEL

DIY TIMBER PRESERVATIVE PRODUCT DATA SHEET

Description

NO-ROT GEL is a ready to use, water based brush on wood preservative, to control the spread of decay. It is formulated to penetrate by diffusion into the timber, while still allowing the surface to be painted over. NO-ROT GEL can also be used to kill surface mould, algae or fungi on timber, masonry or concrete surfaces.

Recommended Uses

NO-ROT GEL can be used to treat timber that has been affected by decay, mildew or insect attack. NO-ROT GEL is ideal for use in external areas such as timber window frames and posts that are intended to be painted with an oil or water based paint. It is also ideal for use in internal timber framing where moisture is a problem, such as bathrooms or under subfloors with poor ventilation.

RESTRAINTS. NO-ROT GEL is not to be used on timber exposed to rain (ie without a painted finish or surface coat), timber in contact with the ground, or surfaces that come into contact with foodstuffs or drinking water.

Directions For Use

Apply NO-ROT GEL to the timber surface using a brush, roller or spray gun. If the timber is very dry, it is best to dampen the timber with water to allow better penetration of NO-ROT GEL. For effective treatment against decay, mould and insect attack, use the following table apply the correct dosage to the timber.

RECOMMENDED DOSAGE RATES PER SQUARE METER			
Required depth of diffusion into the timber surface	0-25mm	25-50mm	50-100mm
Amount of NO-ROT GEL required per square meter	500ml	1 litre	2 litres

For correct dosage rates, NO-ROT GEL will require 2 coats. Allow 2-3 hours between coats.

Painting Over No-Rot Gel

Timber treated with NO-ROT GEL can be painted over with either oil or water based paints, primers and undercoats. For best results, allow 5 days for the timber to dry.

Technical Data

Appearance:	Transparent liquid
Boiling Point:	>100°C
Solubility in water:	100% at 20°C
Specific Gravity:	1.22
Odour:	Low odour

Packaging

NO-ROT GEL is packaged in 1lt, 5lt and 10lt containers.

First Aid and Safety Directions

Avoid contact with eyes and skin. When handling NO-ROT GEL, wear protective clothing, gloves, eye protection and a vapour mask if spraying. Store in a cool dry place, out of direct sunlight. Wash contaminated skin or eyes with copious quantities of water for 15 minutes. If ingested, give water to drink. Do not induce vomiting. Seek medical assistance and contact the Poison's Information Service on 13 11 26.

Refer to the MSDS for more information.
